Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/796,391

Applicant(s)

GIUNTOLI ET AL.

Examiner

Rex Holmes

Art Unit

3762

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 28 February 2007.
- 2a) ☒ This action is FINAL. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 16-25 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 16-25 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO/SB/08)
Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date _____
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____

DETAILED ACTION

Terminal Disclaimer

1. The terminal disclaimer filed on 2/28/07 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Pat. 6,735,480 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Claim Rejections - 35 USC § 103

2. Claims 16-25 stand rejected under 35 U.S.C. 103(a) as being unpatentable over GRUZDOWICH (U.S. Pat. 6,178,352) in view of RASMUSSEN (U.S. Pat. 4,524,775).

3. Regarding Claims 16, 19, 22, and 23, GRUZDOWICH discloses a band attached to the housing and said band adapted to secure the housing to the body (Fig. 1, Column 2, Lines 20-25) as a means to securely hold in place the electrodes to the body and a pulse generating circuitry housed within the housing and said pulse generating circuitry operably connected to the electrodes to provide electrical pulses to the nerve through electrodes (Column 2, Lines 20-25) as a means to provide stimulation to the body near the P6 acupuncture point (Column 2, Lines 23-25). But, GRUZDOWICH fails to disclose a gasket to receive the electrodes. However RASMUSSEN discloses a gasket having at least one aperture, said aperture being sized and dimensioned to receive the electrodes, said gasket disposed about the electrodes on the bottom outer surface of the housing (Figure 2, Column 4, Lines 1-8). In addition RASMUSSEN discloses that the thickness of the gasket is greater than that of the electrode, but also when

Art Unit: 3762

compressed would not impede direct contact between the electrodes and the patient (Column 4, Lines 1-8).

4. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the teachings of GRUZDOWICH to include a gasket having at least one aperture, said aperture being sized and dimensioned to receive the electrodes, said gasket disposed about the electrodes on the bottom surface of the housing, as taught by RASMUSSEN, as a means to seal the electrodes to the housing by creating a contact medium chamber and to create an increased connection between the electrodes and the patient.

5. Regarding Claims 17-18, 20-21, and 24-25, GRUZDOWICH in view of RASMUSSEN discloses the claimed invention except for the gasket being neoprene or silicone. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the gasket as taught by GRUZDOWICH, with a neoprene or silicone gasket since it was known in the art that neoprene or silicone is an inexpensive conventional material to provide a tight seal with the body, which helps with the electrode connections.

6. Alternatively, GRUZDOWICH in view of RASMUSSEN discloses the claimed invention but does not disclose expressly the use of neoprene or silicone for the gasket. It would have been an obvious matter of design choice to a person of ordinary skill in the art to modify the gasket as taught by GRUZDOWICH in view of RASMUSSEN with the gasket comprising neoprene or silicone, because the Applicant has not disclosed that the gasket composition provides an advantage, is used for a particular purpose, or

Art Unit: 3762

solve a stated problem. One of ordinary skill in the art, furthermore, would have expected Applicant's invention to perform equally well with gasket as taught by GRUZDOWICH in view of RASMUSSEN, because it provides securement to an apparatus and since it appears to be an arbitrary design consideration which fails to patentably distinguish over GRUZDOWICH in view of RASMUSSEN.

Therefore, it would have been an obvious matter of design choice to modify gasket of GRUZDOWICH in view of RASMUSSEN to obtain the invention as specified in the claim(s).

Response to Arguments

7. Applicant's arguments filed 2/28/07 have been fully considered but they are not persuasive. Applicant argues that Rassmussen does not teach a gasket having a thickness in an uncompressed state, which is greater than the depth of the electrodes. Applicant further argues that the gasket of Rassmussen is not configured to be compressed when applied to the patient. In response Column 4, lines 1-8 of the Rassmussen patent states, "the compression of the part of the foam plastic disc 20 surrounding the aperture 21 to become so shallow that the necessary electrical contact between the electrode strip and the skin can be established...". This explicitly discloses that the electrode is at the base of aperture, and that when disc is compressed the electrode at the bottom of the aperture makes contact with the skin.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3762

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rex Holmes whose telephone number is 571-272-8827. The examiner can normally be reached on M-F 8:00 - 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Angela Sykes can be reached on 571-272-4955. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a
